

# TB Community Led Monitoring activities

**Stop TB Partnership**

hosted by  
 **UNOPS**

Implemented by:  
**ADPP**  
Mozambique

## Collaborating Partners

The implementation of OnelImpact-Gaza by ADPP, is carried out in partnership with AMIMO, under the leadership and guidance of the National TB Program. ADPP and AMIMO have had their first meeting to define areas of operations, as well as the training package that will be developed by NAMATI. The meeting was followed by an agreement signature between ADPP and NAMATI. The TOT in health human rights will be carried out within the coming weeks by NAMATI.

“ The TB Community Led Monitoring activities, patients centered in rural populations of Gaza, is now an assumed commitment of the districts governments. A belief of Gaza free from TB has committed local radios in this battle. ”

OnelImpact –Gaza (Mozambique), it's a TB Community-Led Monitoring program implemented by ADPP, which aims to transform the TB response to be equitable rights-based and patients centered. The platform fearlessly gives voice to TB patients to express their concerns under the accessibility, acceptability, availability and quality of TB services. OnelImpact-Gaza has been presented to four community local radios (Radio Xai-Xai, Chibuto, Mazivila and Chokwé) last week, which will be at the forefront towards it's promotion in the targeted districts. It has been agreed to broadcast OnelImpact activities once per quarter.
